## Notice of Fee Increase on October 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on October 1, 2003. See Revision of Patent Fees for Fiscal Year 2004; Final Rule, 68 Fed. Reg. 41532, 41533, 41534 (July 14, 2003).

The current fee schedule is accessible from (<http://www.uspto.gov/main/howtofees.htm>).

If the fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due" but not the correct amount in view of the fee increase, a "Notice of Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice of Pay Balance of Issue Fee," if the response to the Notice of Allowance is to be filed on or after October 1, 2003 (or mailed with a certificate of mailing on or after October 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously-paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Effective October 1, 2003, 37 CFR 1.18 is amended by revising paragraphs (a) through (c) to read as set forth below.

### Section 1.18 Patent post allowance (including issue) fees.

- (a) Issue fee for issuing each original or reissue patent, except a design or plant patent:
- By a small entity (Sec. 1.27(a))..... \$665.00
  - By other than a small entity..... \$1,330.00
- (b) Issue fee for issuing a design patent:
- By a small entity (Sec. 1.27(a))..... \$240.00
  - By other than a small entity..... \$480.00
- (c) Issue fee for issuing a plant patent:
- By a small entity (Sec. 1.27(a))..... \$320.00
  - By other than a small entity..... \$640.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

***Allowable Subject Matter***

1. Claims 1-57 allowed over prior art.
2. The following is an examiner's statement of reasons for allowance: Applicant has amended previously rejected claims 1 and 6, to include the limitations of claims 2 and 9. Although the combined cited art, Varma et al, Lyles et al, Ramakrishnan, Daniel et al, teaches traffic management in an ATM switch (packet organizer) and associated output port is coupled to multiple memory devices/queues for storing data wherein that the ATM utilizes a scheduler for maintaining traffic continuity, controller/scheduler is coupled to multiple memory, ATM support various service classes wherein priority mechanism associated with round robin separates traffic classes from each other whereby CBR traffic class is given the highest priority and the remaining classes (VBR, ABR, UBR) are given lower priority, queues divided into groups where queues in a first group are served using WFQ scheduling and queues in remaining groups are serviced using round robin technique, a buffer associated with an ATM switch is coupled to a controller/scheduler, an output queued routing mechanism, packets are delivered to the output port of an ATM, plurality priority output FIFO queues, round robin servicing, queues coupled to scheduler and memory pointers associated with queues, and multiple queues, scheduler, round robin pointers used to implement scheduler wherein queues are coupled to a control logic device, ATM system there exist virtual connections such as virtual pipelines connecting users of a network wherein each pipeline serves more than one pair of users, high priority packet identifier, a scheduler that services locations according to a plurality of scheduling cycles, wherein said first

location and one of said  $n$  time slot locations can be serviced for each of scheduling cycles, such that,  $n$  of said scheduling cycles results in said first location being serviced  $n$  times and said  $n$  time slot locations each being serviced one time, said servicing of a said location causing removal of a said packet identifier stored therein, said removal of a said packet identifier stored therein causing sending of a packet identified by said packet identifier from said packet buffer to said networking line, wherein each of said scheduling cycles corresponds to an output rate defined by an amount of packet data sent from said packet buffer per unit of time they fail to teach or suggest "a third location, having a higher priority than first adj location, and fourth location having a higher priority than a second location, configuring first location for a percentage of scheduler's resources, configuring a plurality of second locations for a percentage of scheduler's resources, consuming a percentage of first second location's servicing with packet identifiers from first location if first location has packet identifiers that exceed first location's configured for percentage of scheduler resources.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
